DETAILED ACTION

1. This Office action is in response to the applicant's communication filed on 10/7/11.

Specification

2. The amendment to the specification filed on 10/7/11 is acceptable.

Claim Objections

3. Claims 1, 10, 19, 29 and 30 are objected to because of the following informalities:
 4. Claims 1, 19, 29 and 30: The limitation that states that the inner and outer sleeves are openable/separable such that the sleeves can be removed from the first and second hollow organs without severing said first and second hollow organ should be amended to remove the "without severing" limitation as the specification does not clearly provide support for this limitation.
 5. Claim 10: The claim should be amended to recite to "wherein a portion of at least one of the inner sleeve and the outer sleeve is made of a plastic material". The current limitation as claimed would prevent the sleeve from having an electrically conductive element.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 3773

7. Claim 7 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 7 recites that the inner sleeve comprises predefined breaking sites, while claim 1 has been amended to recite that the inner sleeve comprises two annular surfaces that are electrically connected to one another by way of connecting elements. These two claims are directed towards different embodiments that are not disclosed to be usable together. Therefore, the combination of both embodiments, as recited in claim 7, raises the issue of new matter.

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1-19, 21-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

10. Independent claims 1, 19, 29 and 30 have been amended to recite that the inner sleeve comprises two annular contact surfaces which are electrically connected to one another by way of connecting elements, wherein an annular contact surface is connected to an electrical supply cable. However, each of these independent claims have also previously recited that the inner sleeve already comprises an electrical connector. It is unclear if the electrical supply cable is the same structure as the

Art Unit: 3773

electrical connector, of if it is meant as an additional electrical connector (though there is no support for this in the specification). Therefore, the claims are rendered indefinite.

Response to Arguments

11. Applicant's arguments with respect to claims 1-19, 21-30 have been considered but are moot in view of the new ground(s) of rejection.

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
